## Dental Practitioners

Dental practitioners, registered & regulated under Medical Dental Council in Malaysia, are encouraged to obtain professional indemnity insurance to protect both patients and them from events related to adverse outcomes, inquiries, and disputes. Albeit the constant development in the regulation currently for Medical Doctors, Dental Practitioners are not out of the radar considering their pivotal role in healthcare. It is important that you protect yourself for the possible adverse outcome with regards to your practice.

### Why you need indemnity insurance to cover your practice?

1. Failure to diagnose patient condition.
2. Failure to provide proper periodontal disease treatment in a timely manner.
3. Injuries to oral nerves during anaesthesia administration, tooth replacement, crowns or after a tooth extraction.
4. Root canal injuries due to loosed or damaged filling.
5. Tooth extraction complication such as tooth breakage or excessive bleeding.
6. Patient suffered with tooth loss, advanced untreated gum disease, bone loss, or serious infection following dental implants.
7. Adverse drug reactions by the patient.
8. Wrongful death.
